M. YUVARAJ

Data Analyst | Healthcare & E-Commerce Analytics

Chennai | +91-7092000466 | yuvarajmurugan466@gmail.com

PROFESSIONAL SUMMARY

Data Analyst with 4.3 years of experience in Healthcare and E-commerce analytics, specializing in Advanced SQL, Power BI (DAX, Data Modeling), Tableau, and Python for data processing and analysis. Handled 10M+ record datasets, built KPI frameworks, and delivered executive dashboards that supported strategic decision-making. Strong background in healthcare claims analytics, statistical analysis, and business performance optimization.

TECHNICAL SKILLS

- **Languages & Querying:** Advanced SQL (Joins, CTEs, Subqueries, Window Functions, Query Optimization), Python (Pandas, NumPy)
- **BI & Visualization:** Power BI (DAX, Data Modeling, Star Schema, Power Query, Dataflows, Power BI Service, Gateway), Tableau (LOD Expressions, Parameters, Calculated Fields, Tableau Prep)
- **Databases & Data Engineering:** MySQL, RDBMS, Data Warehousing Concepts, ETL Pipelines, Data Cleaning, Data Validation, Large Dataset Handling (10M+ Records)
- **Analytics:** Statistical Analysis (Hypothesis Testing, Regression, A/B Testing), Cohort Analysis, KPI Reporting, Executive Dashboarding

WORK EXPERIENCE

Data Analyst | Alfa Information Technologies **Jul 2022 – Present**

Project 1: Imobisoft | Healthcare Analytics *Sep 2023 – Present*

- Designed and optimized star-schema Power BI data models integrating claims systems, provider directories, eligibility files, and member databases.
- Processed and validated 10M+ healthcare claims records, ensuring data accuracy and HIPAA compliance.
- Developed 15+ interactive Power BI dashboards tracking Claims TAT, denial rates, readmissions, provider performance, and cost trends.
- Built reusable DAX measure libraries for YoY, MoM, rolling averages, and benchmark comparisons.
- Implemented SQL and Python-based data validation frameworks to detect anomalies and duplicates.
- Performed hypothesis testing and regression analysis to evaluate healthcare program effectiveness.
- Identified high-cost procedures and fraud indicators, supporting cost containment strategies.
- Implemented recurring reports in Power BI Service, reducing manual reporting effort.
- Documented data models and transformation logic for governance and maintainability.

Project 2: Burst Digital | E-Commerce Analytics *Jul 2022 – Aug 2024*

- Designed end-to-end Tableau dashboards integrating sales, customer behavior, subscription, and inventory datasets.
- Wrote advanced SQL queries (CTEs, window functions, subqueries) on 5M+ transactional records.
- Built KPI frameworks for revenue trends, customer retention, subscription performance, and product profitability.
- Developed advanced Tableau calculations using LOD expressions and parameters.
- Conducted cohort analysis and A/B testing to evaluate marketing campaign effectiveness.
- Identified underperforming SKUs, enabling inventory optimization strategies.
- Built ETL workflows using Python (Pandas) and Tableau Prep.
- Collaborated with marketing and supply chain teams to drive data-backed decisions.

EDUCATION

B.E. – Computer Science & Engineering **2013 – 2017**

Ganadipathy Tulsi's Jain Engineering College, Anna University
